

NABA Membership-Atala Chapter (NABA - North American Butterfly Association)

The following is an excerpt from an article by Jeffrey Glassberg, president of the North American Butterfly Association, from the 1995 Fall issue of American Butterflies:

" A major purpose of NABA is to encourage people to enjoy butterflies---to have fun. Some people love butterfly gardening, others focus on photography or pursue a big list, while still others relax by observing butterflies at play. NABA tries to help you derive greater pleasure from all of these activities. Obviously, none of this pleasure would be possible without the butterflies themselves. Thus, by necessity, we become butterfly conservationists . . .

. . . I urge you to become active in your local NABA chapter, if one already exists, or to take the initiative and form a NABA chapter in your area. Not only will you and like-minded people have a great time, the butterflies will thank you."

When you join NABA not only will you support the organization on the national level, you will also be supporting your local chapter. With your membership you will receive American Butterflies, a quarterly publication filled from beginning to end with beautiful color pictures and helpful articles about butterflies, and Butterfly Garden News, also a quarterly publication.

Please photocopy the membership application form below and pass it along to friends and acquaintances that might be interested in NABA.

NABA-Atala Chapter

Yes! I want to join NABA and receive American Butterflies and Butterfly Garden News.

Name: _____

Address: _____
